1.0 Introduction

A001 - As is Process Mapping aims to document Makai's initial process mapping activities. With this, Makai can identify areas of improvement for efficiency and organization within the Industrial Base Resilience (IBR) organization. Through this project, Makai has created two standard operating procedures (SOPs) where there were no existing processes or the existing processes needed fixing, causing significant issues within the organization. Moreover, this project serves as a starting point for process re-engineering. Makai will continue to develop as-is process maps as they work to improve the organization and its processes.

During the initial 90 days on the contract, Makai conducted interviews, observed if and how processes were being followed, and built out representations of the current process map landscape. While there are existing processes, not all people know about, understand, or follow the existing processes. There is also an excellent opportunity for improvements and increased efficiency in the current processes. Makai observed a disconnect between how processes should work based on current expectations and how they currently work. Some significant gaps identified were the need for more information conduits to move items through each step of the process and more quality training materials to ensure IBR team members understand each step. Addressing the inefficiencies in processes and improving training will help increase the success of following efficient processes.

2.0 SOP: Industrial Base Resiliency (IBR) Front Office Procedure for Correspondence and Scheduling

Introduction

The purpose of this SOP is to document the process for managing all correspondence addressed to the IBR Deputy Assistant Secretary of Defense (DASD) and team. The DASD requested that a standard be made within the IBR Front Office. By creating this document, Makai has established a consistent and efficient procedure, thus reducing confusion and disruptions in the office. Creating this SOP was an immediate action needed to promote efficiency and organization within the IBR Front Office.

Overview

This SOP outlines the Industrial Base Resiliency (IBR) Front Office procedure for managing all correspondence addressed to the IBR DASD and team. This procedure aims to streamline communication channels, enhance efficiency, and ensure that all incoming correspondence and requests are handled promptly and appropriately.

Purpose

This Front Office Procedure aims to establish a clear protocol for managing communication and scheduling involving the IBR DASD, ensuring that all relevant information reaches the intended recipients efficiently and that scheduling and engagement requests are effectively coordinated.

Communication Protocol

Funneling Correspondence

All correspondence addressed to the DASD shall be funneled through the Chief of Staff (COS). Correspondence includes emails, letters, memos, and other forms of written communication. The COS will ensure that only relevant and essential information is presented to the DASD, reducing unnecessary distractions and optimizing their time.

The COS shall receive and manage all incoming correspondence (emails, letters, requests, etc.). They will sort and prioritize incoming messages based on urgency and importance, and promptly channel urgent matters to the relevant personnel.

See [Appendix A](#) for Internal and External Communication Protocols.

Scheduling

1. The DASD's Special Assistant will be the designated point of contact for all scheduling and engagement requests related to the DASD's calendar.
2. Any individual or entity seeking to schedule a meeting, event, or engagement with the DASD must submit their request to the Special Assistant for coordination.

External engagement requests of any IBR Team member, aside from the DASD, who will be accessed through her Special Assistant, will go through the Chief of Staff.

Approval

1. Correspondence item received: The correspondence item is received by the Chief of Staff in the Front Office.
2. Is item relevant to IBR: The Chief of Staff assesses whether the correspondence item is relevant to the IBR organization.
3. Communicate irrelevance to requestor: If the item is identified as irrelevant to IBR, the Chief of Staff communicates this to the requestor, indicating that the item will not be further processed.
4. Disseminate to proper organization: If the item is deemed relevant to IBR, it is disseminated to the appropriate organization responsible for further handling.
5. Assign organization and set suspense date: The Front Office assigns the relevant organization to handle the item and sets a suspense date, allowing time for the DASD to review.
6. Send to DASD for review: The item is put into the DASD's review folder on the O:/ Drive (ATL_ORG (O:) > IndPol2 > IBR > DASD > DASD Approvals).
7. If Approved: After DASD review and approval, they will move the item to the complete folder within the DASD review folder on the O:/ Drive.

(ATL_ORG (O:) > IndPol2 > IBR > DASD > DASD Approvals > Complete).

8. Return to Tasker for further processing: If the item is approved, it is returned to the original tasker, who can proceed with further processing and forwarding it to its intended destination.
9. Provide feedback and revision request: If the item is not approved during the DASD's review, feedback is provided to the tasker, and they may be required to make revisions or updates before resubmitting the item.
10. Task completed: Once the item is approved and further processed, the task is considered completed and then moved into the Archive folder in the DASD's review folder (ATL_ORG (O:) > IndPol2 > IBR > DASD > DASD Approvals > Complete > Archive)

Implementation

Correspondence Handling

Upon receipt of incoming correspondence, all front office staff shall review and determine its relevance and priority. If the correspondence requires the DASD's attention, it shall be forwarded to the Military Assistant and Chief of Staff, who will then decide on the appropriate course of action.

Non-critical or routine matters may be addressed directly by the front office staff, following established guidelines and procedures.

Communication Etiquette

Prompt Responses

Front Office staff will aim to respond to all correspondence and requests as soon as possible. Acknowledgment of receipt will be provided whenever feasible, with more detailed responses to follow as required.

Confidentiality and Security

Front Office staff must uphold strict confidentiality and security standards regarding sensitive information received in correspondence or through scheduling and engagement requests.

Periodic Review

The effectiveness of this Front Office Procedure shall be periodically reviewed by management to identify any areas of improvement and make necessary adjustments. Staff will be updated on changes in communication technologies and best practices.

Managing Outgoing Communication

1. The Front Office staff will draft, review, and edit outgoing correspondence to ensure clarity and professionalism, obtain necessary approvals before sending official communications, and maintain a record of outgoing correspondence for reference and accountability.
2. All sensitive information will be handled with utmost confidentiality and discretion.
3. In any incoming or outgoing correspondence, do not disclose any confidential information without proper authorization.
4. The Front Office will respond to correspondence promptly, acknowledging receipt of messages when possible. Prioritize urgent matters and aim to respond to all communications promptly.
5. The Front Office staff will designate specific personnel as official spokespeople for media inquiries.
6. The Front Office staff will ensure consistent messaging and alignment with the office's objectives in all external communication. Coordinate press releases and media statements with relevant departments before dissemination.

Correspondence

See [Appendix C](#) for all correspondence information and examples.

Points of Contact

The up-to-date Points of Contact can be seen in [Appendix D](#).

3.0 SOP: Reserving the Industrial Base Resiliency (IBR) Front Office Director Hotel Desk

Introduction

This SOP was created by specific request of the DASD. It was requested due to the lack of organization and confusion when using the in-office Director Hotel Desk. By creating this document, Makai has instituted a procedure that is consistent and efficient, thus reducing confusion and disruptions in the office. The creation of this SOP was an immediate action that was needed to promote efficiency and organization within the IBR Front Office while ensuring the atmosphere remains conducive to a focused, appropriate Front Office environment.

Overview

The Director Hotel Desk has been authorized for use of directors only, as such, this SOP outlines the IBR Front Office process and procedures for scheduling, utilizing, and management. The objective of the hotel desk is to increase productivity, resolve scheduling conflicts and create flexibility among directors within IBR.

Purpose

This Director Hotel Desk Front Office Procedure aims to establish a clear protocol for managing and properly scheduling the Director Hotel Desk within IBR's Front Office. This SOP outlines a clear step-by-step process for requesting and reserving the Hotel Desk. The creation of this SOP ensures the guidance set forth is disseminated throughout IBR DASD as policy.

Procedure

The following individuals can reserve the Director Hotel Desk:

1. Director
2. Executive Assistant
3. Chosen representative of the Director

To reserve the Director Hotel Desk, the chosen individual will do the following:

1. Representative will utilize the [IBR Front Office Calendar](#) to select the day for which they would like to reserve the Director Hotel Desk.
2. If the day is open, the representative shall select the day and send the calendar invite to the IBR Front Office.
3. If the day is not open, the desk is not available for use.
4. Once the calendar invite is received by the IBR Front Office staff, a DASD's staff member will approve or deny the request. If the request is denied, the requestor will need to select their reservation for another day.

Points of Contact

The up-to-date Points of Contact can be seen in [Appendix D](#).

4.0 Process Maps

Makai began our interview by identifying significant processes and key personnel within IBR. We started by interviewing leaders within each organization, and during the interviews, we identified additional interviewees to give us more insight into processes. Each interview gave us insight into current process structures, the implementation of the current processes, and the desired outcomes and goals of various processes. We utilized a set of predetermined questions tailored to each process we examined and added ad hoc questions when needed for clarification or more in-depth information. Additionally, we scheduled follow-up interviews to ensure we captured processes correctly and to get more details once we collected data on each process from various personnel that could be reviewed with our interviewees.

IBR Front Office Tasker and Package Correspondence Process

The process map below depicts the lifecycle of tasker and package requests processed through the Correspondence Manager (CM) and the IBR Front Office. During this process, the Action Officer (AO) prepares, updates, and packages the tasker for review. Upon completion, the AO will send the package to the CM for review and approval. If any discrepancies are found, the CM returns the package to the AO for updates and corrections. Upon approval by the CM, the CM sends the package to the DASD for approval/signature. If discrepancies are found, the DASD will return the package to the CM for updates and corrections. Upon approval, the DASD will approve, sign, and return the package to the CM for review and tracking purposes. Once complete, the CM returns the package to the original tasker/AO for action.

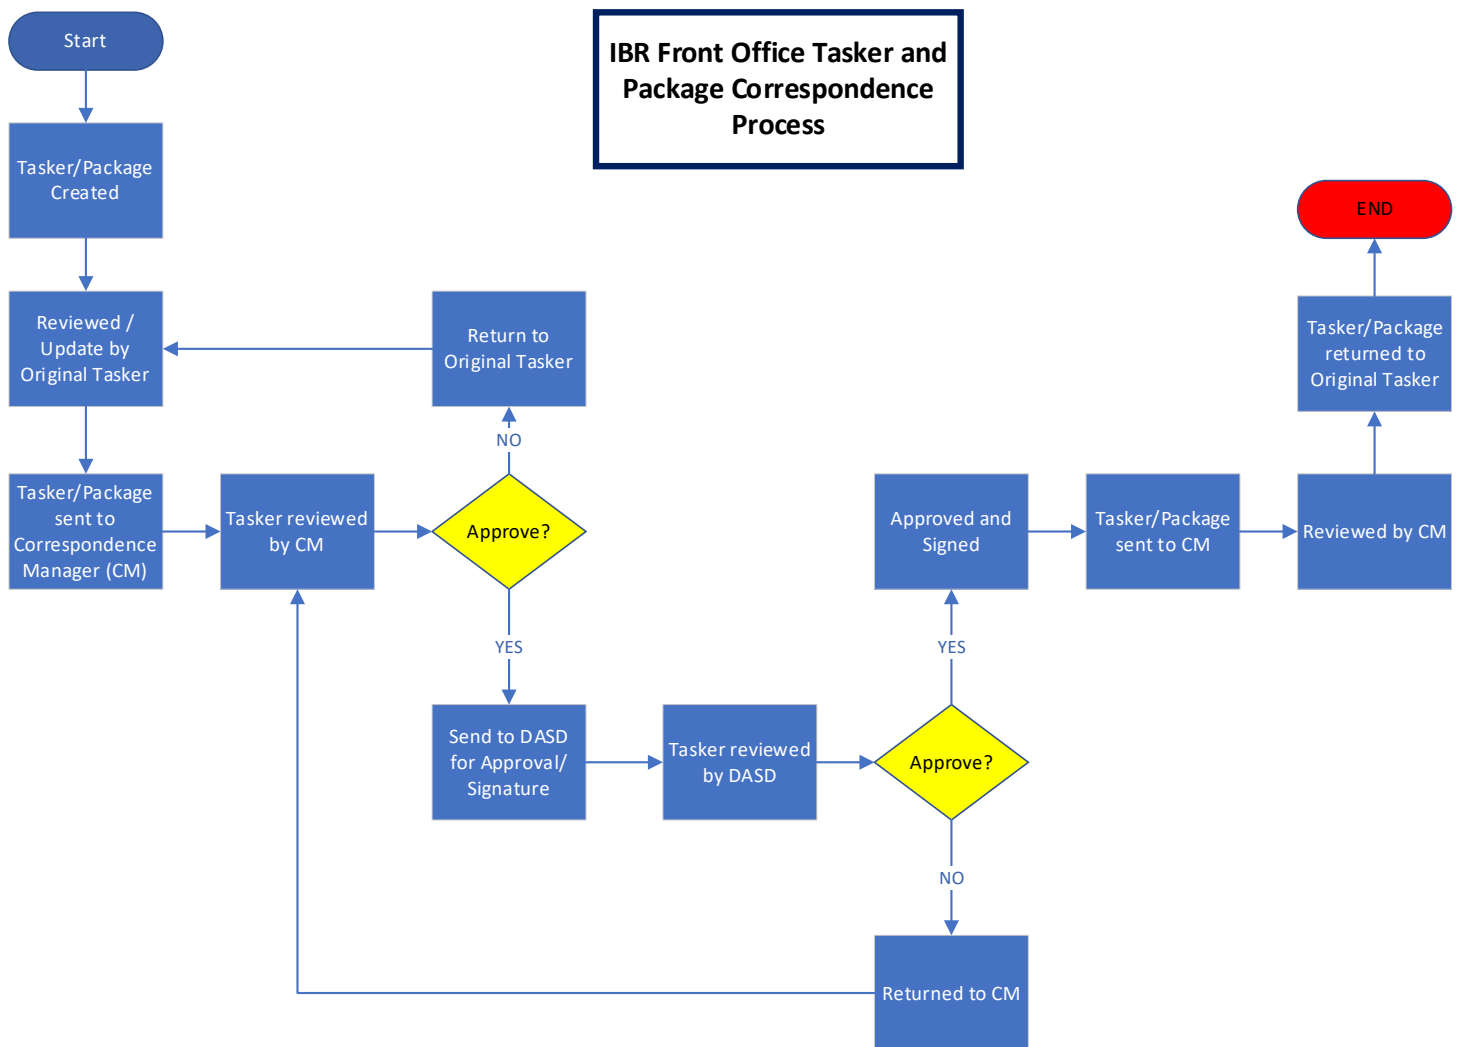

Figure 1: IBR Front Office Tasker and Package Correspondence Process

Chief of Staff Tasker and Package Correspondence Process

The process map below depicts the lifecycle of tasker and package requests processed through the Chief of Staff (COS) and the IBR Front Office. Within this process, the AO prepares, updates, and packages the tasker for review. Upon completion, the AO sends the package to the COS for review and approval. If discrepancies are found, the COS will return the package to the AO for updates and corrections. Upon approval by the COS, the COS sends the package to the DASD approval folder for approval/signature. If discrepancies are found, the DASD will return the package to the COS for updates and corrections. Upon review and approval by the DASD, DASD approves, signs, and returns the package to the COS for review and tracking purposes. Once complete, the COS returns the package to the original tasker/AO for action.

Makai identified an immediate change to this process to clean up the organization and add to its efficiency. When the Chief of Staff sends out the package, the package goes straight to a created folder named “DASD Approval.” The DASD goes into this folder and can approve or reject the package. Upon approval of the package, the DASD places the package into the “Approved” folder. By implementing this change, all parties involved can track all the packages coming in rather than attempting to track the packages via email.

Chief of Staff Tasker and Package Correspondence Process

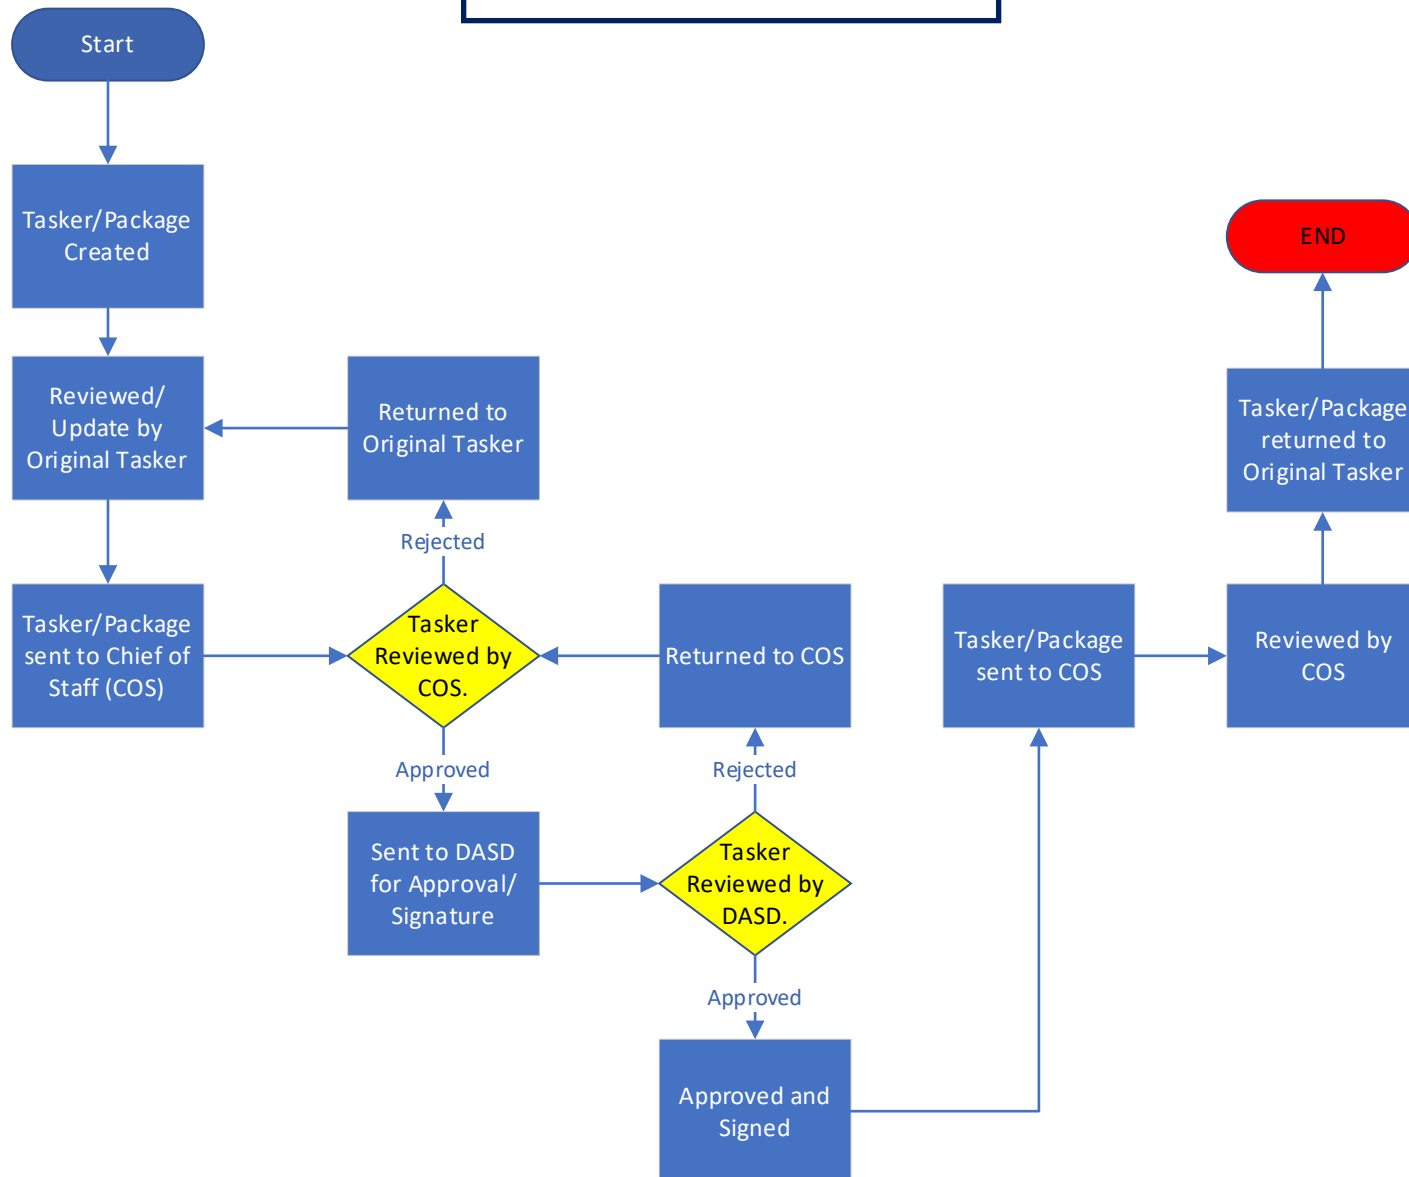

Figure 2: Chief of Staff Tasker and Package Correspondence Process

DASD IBP Submittal Process

The situations depicted below outline the required process to follow when submitting a package, action memo, or email to the ASD / USD. For further context, please refer to [Appendix D: Situations](#), which outlines each situation and the steps required to obtain IBP FO and ASD approval.

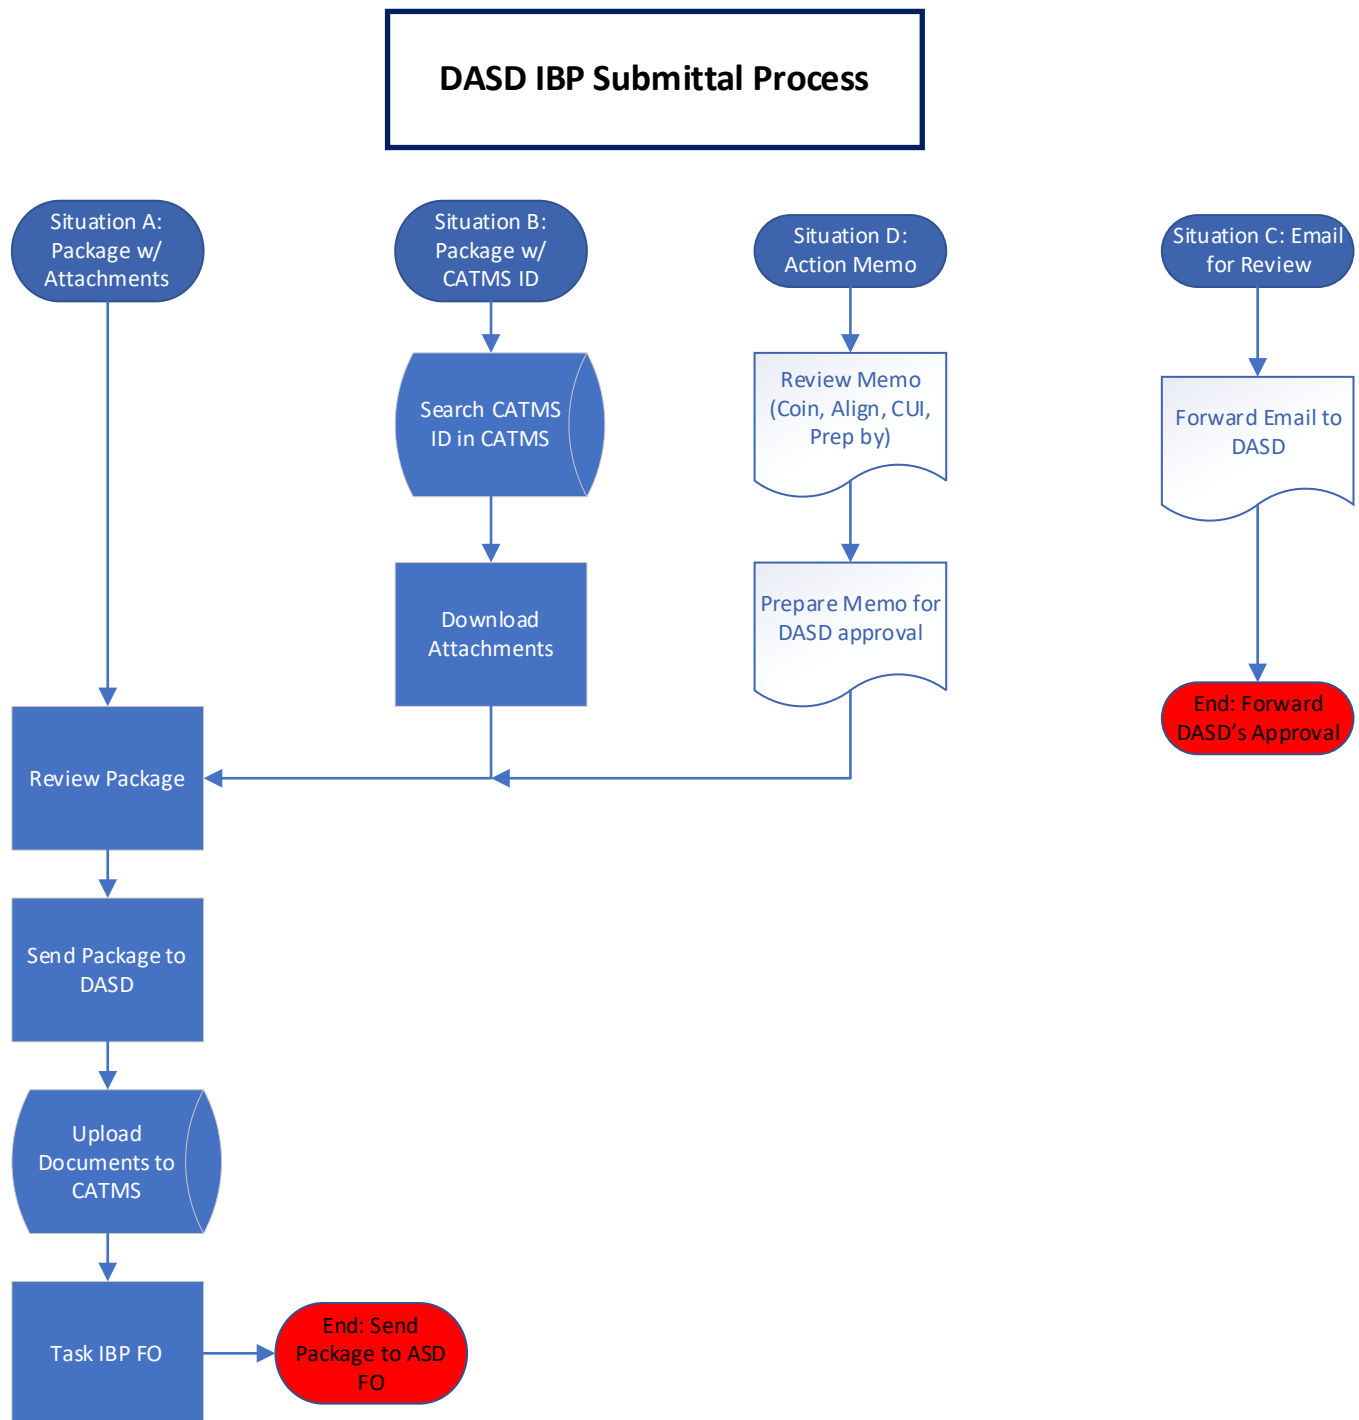

Figure 3: DASD IBP Submittal Process

DASD IBR Action Memo Process

The process map below outlines the steps required to assign, review, coordinate, approve, and sign action memos. If a task needs coordination, the Correspondence Manager (CM) will review the email, task, or other documents in CATMS. Once reviewed, the CM will accept the CATMS task and confirm the deadline. If a delegation is required, the CM will delegate the task in CATMS to the Directorate and email the Directorate Chief of Staff (COS). The Directorate COS will review the task and assign it to the Action Officer (AO) via email. The Directorate will CC the CM on the tasking assignment. AO will accept the task in CATMS, email the Directorate COS receipt, and CCs the CM. The AO will draft memos and emails to the Directorate COS for review. Once the Directorate has conducted the review, the Director will be emailed with the request for approval, and the AO will be CC'd. If approved, the Director will sign, and concur with an email to the AO, CCing the COS. The AO will then upload the memo to CATMS and assign it to OGC/LA in CATMS. The Coordinating Office (CO) will accept the task in CATMS and email the AO. The CO will conduct a final review, concur and mark it as complete in CATMS. The CO will complete the process by emailing the AO that the process is complete.

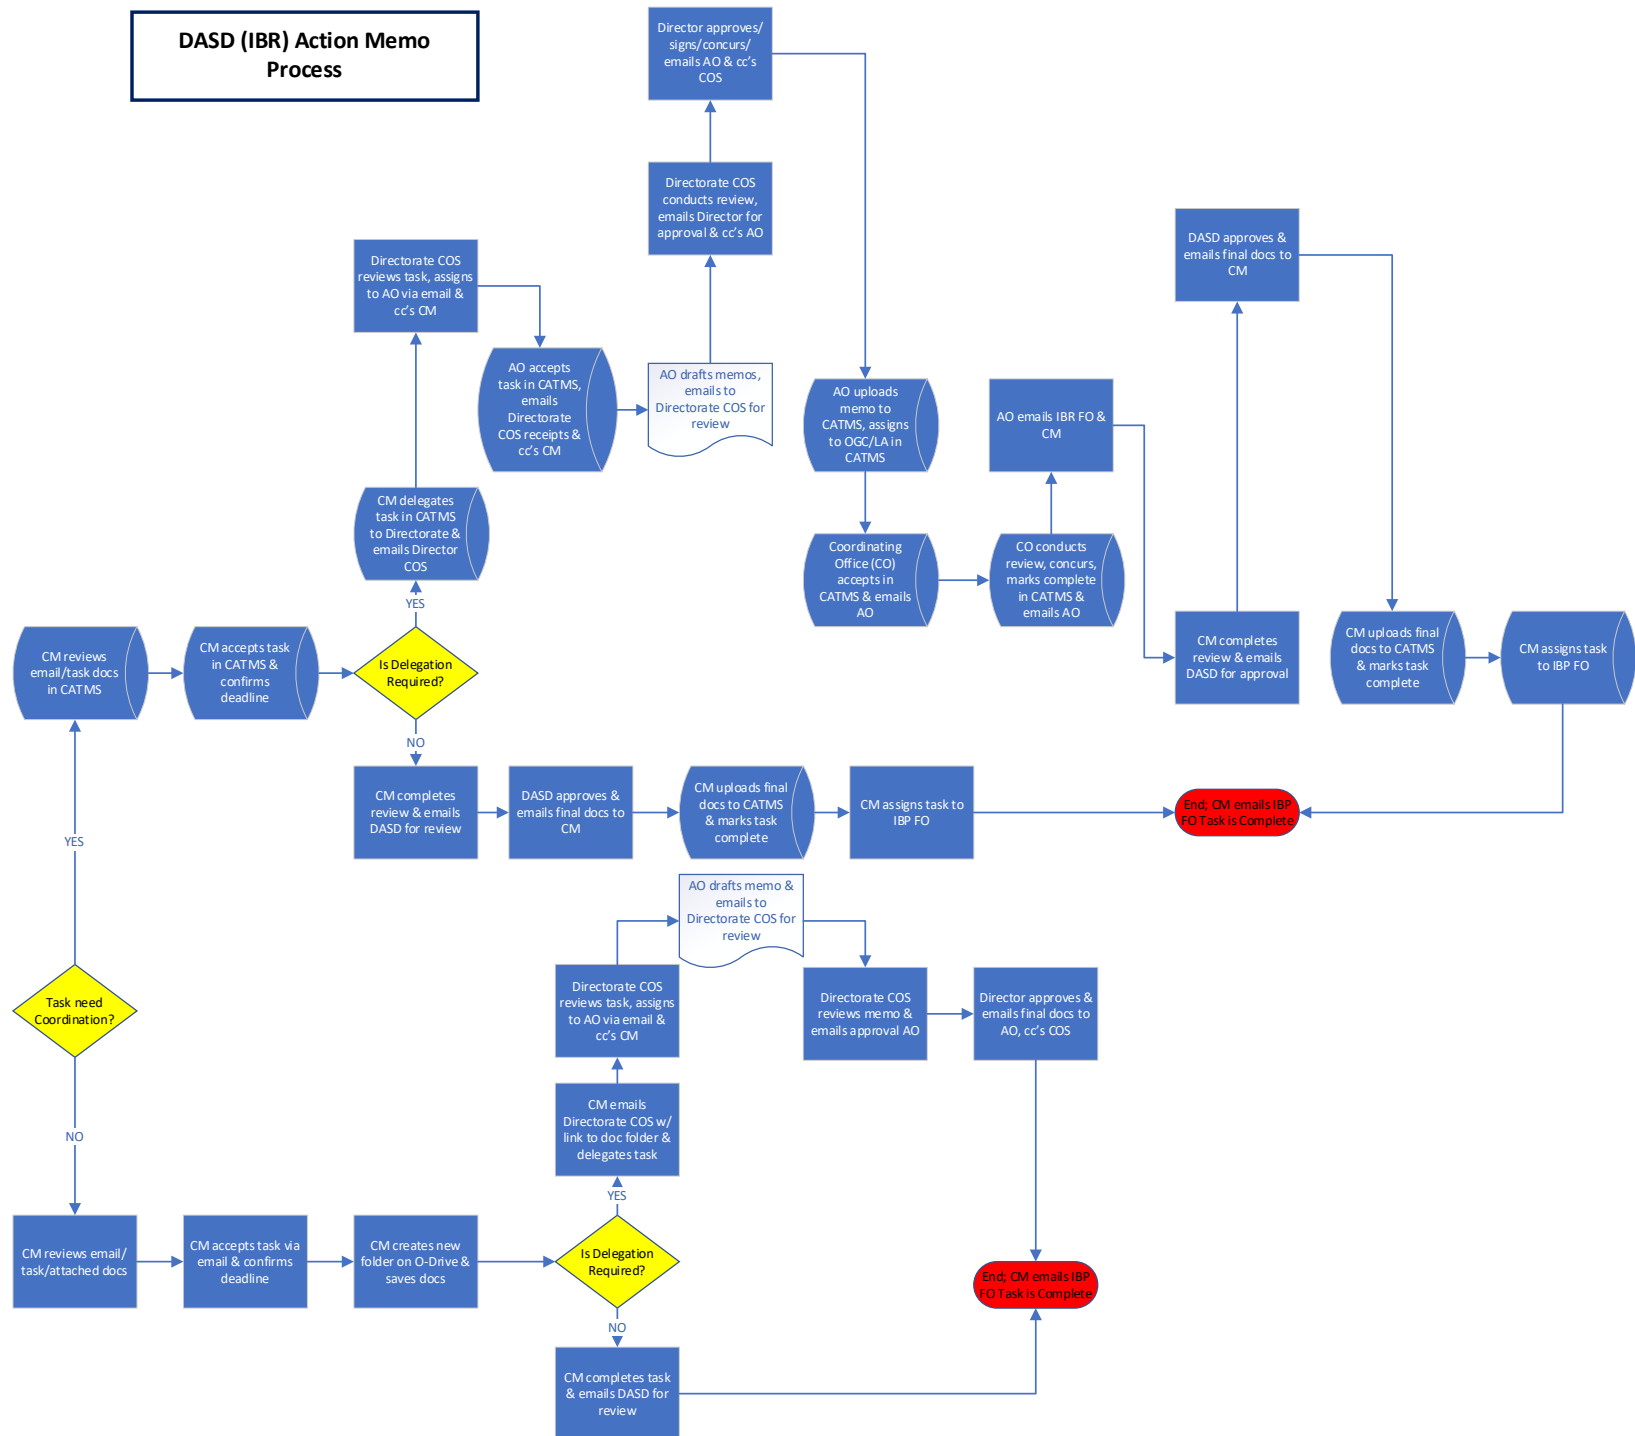

Figure 4: DASD IBR Action Memo Process

DASD IBR Support CFIUS Process

The process map below outlines the timeline and steps required to review, coordinate, approve, or reject declarations via DASD concurrence. When a declaration is received, an inquiry is completed for DASD concurrence during this process. Once a declaration is accepted by the Department of Treasury (USDT), USDT will submit the declaration to CFIUS for GIES review with coordination by OGC and LA. Upon completion of the review, DASD will evaluate if the declaration presents a national security concern. If the declaration does not possess any concerns, DASD will sign with concurrence. If the declaration presents a national security concern, DASD will submit the declaration for investigation with coordination by OGC and LA. Once mitigation is determined, DASD will submit a concurrence or nonconcurrence recommendation to CFIUS for a final decision. CFIUS will either approve or reject the declaration during the final decision phase. CFIUS will implement the mitigation plan upon approval and send it to DASD for concurrence. CFIUS will either reject the filing, voluntary disinvest, or withdraw and abandon the declaration, with DASD concurrence.

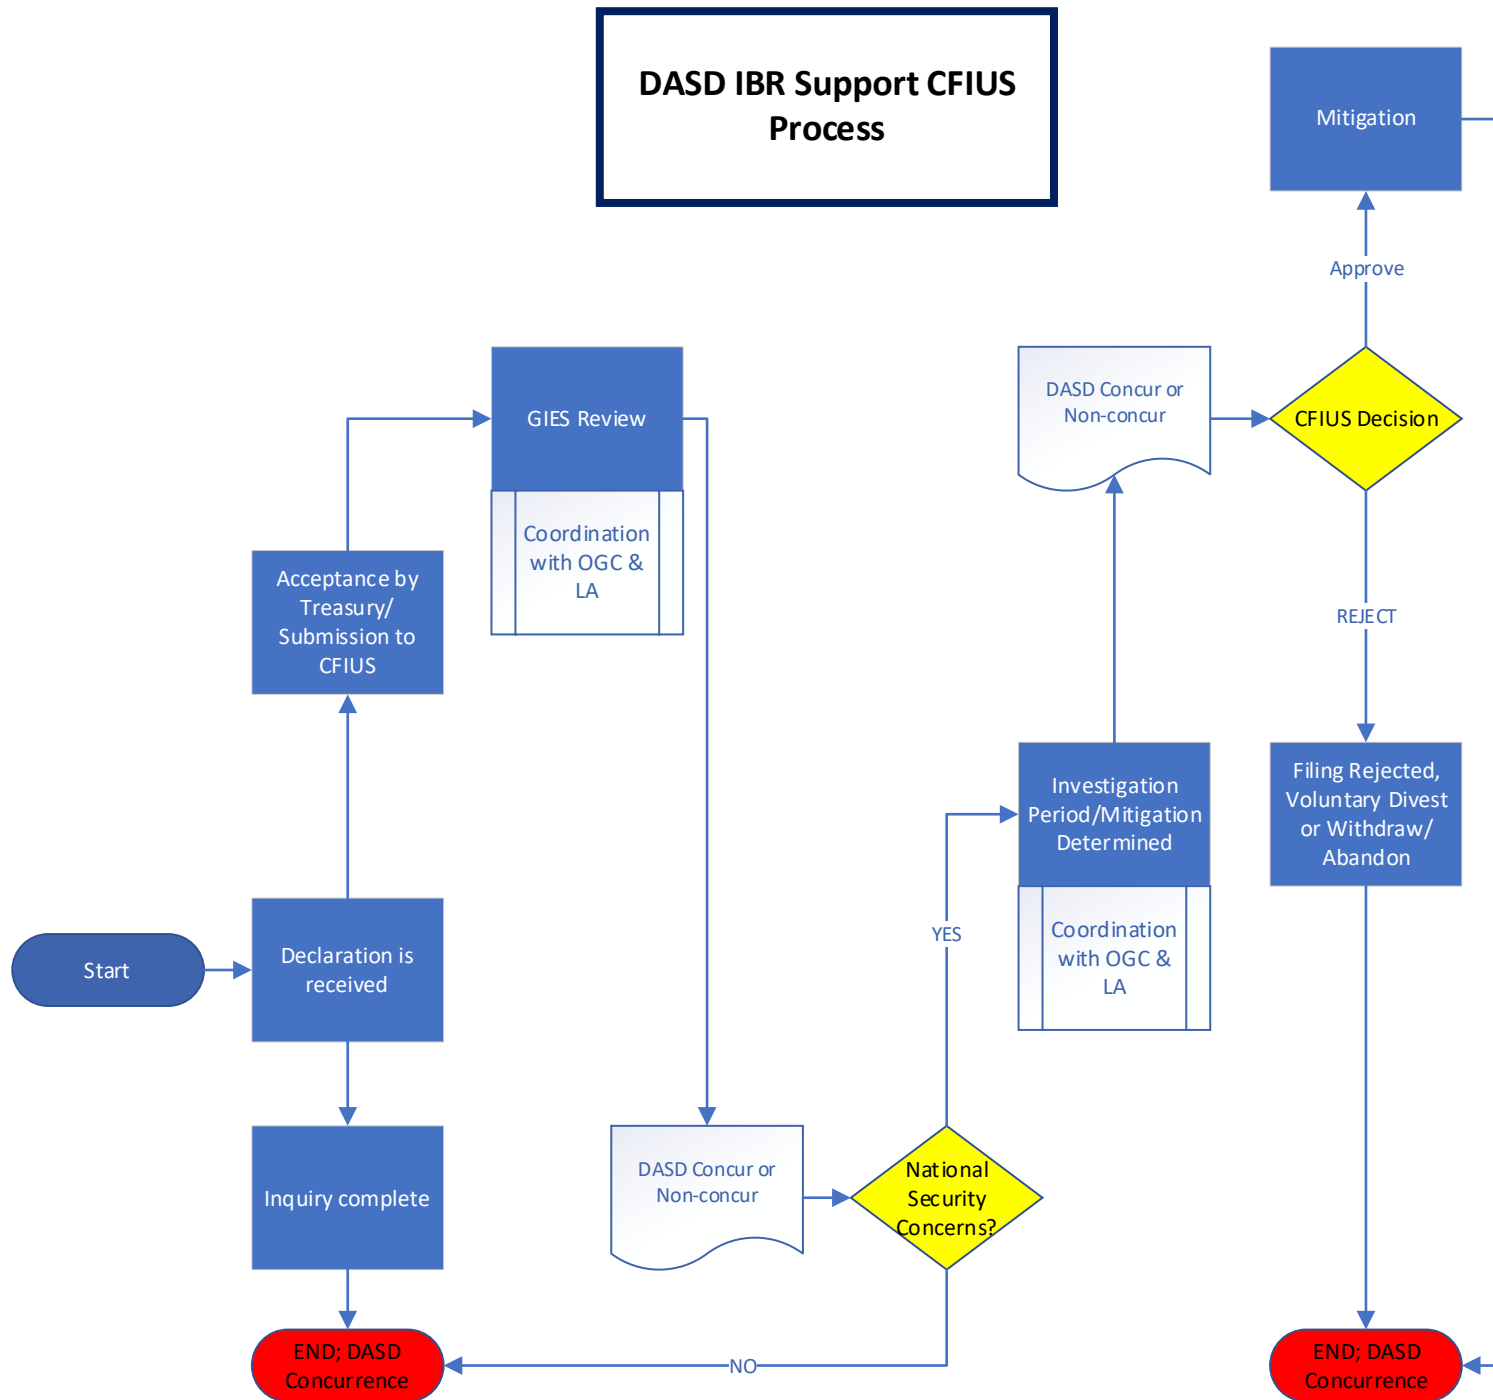

Figure 5: DASD IBR Support CFIUS Process

GES Storage and Documentation Process

The process map below outlines the necessary steps to upload, download, and transfer correspondence using SharePoint and O-Drive for USDT accessibility. When a document is received via O-Drive, GES downloads it and uploads it to SharePoint for accessibility and collaboration among stakeholders and offices within GES. After the document has been updated in SharePoint, it is downloaded again and uploaded to the Archive folder on the O-Drive or made accessible via USDT.

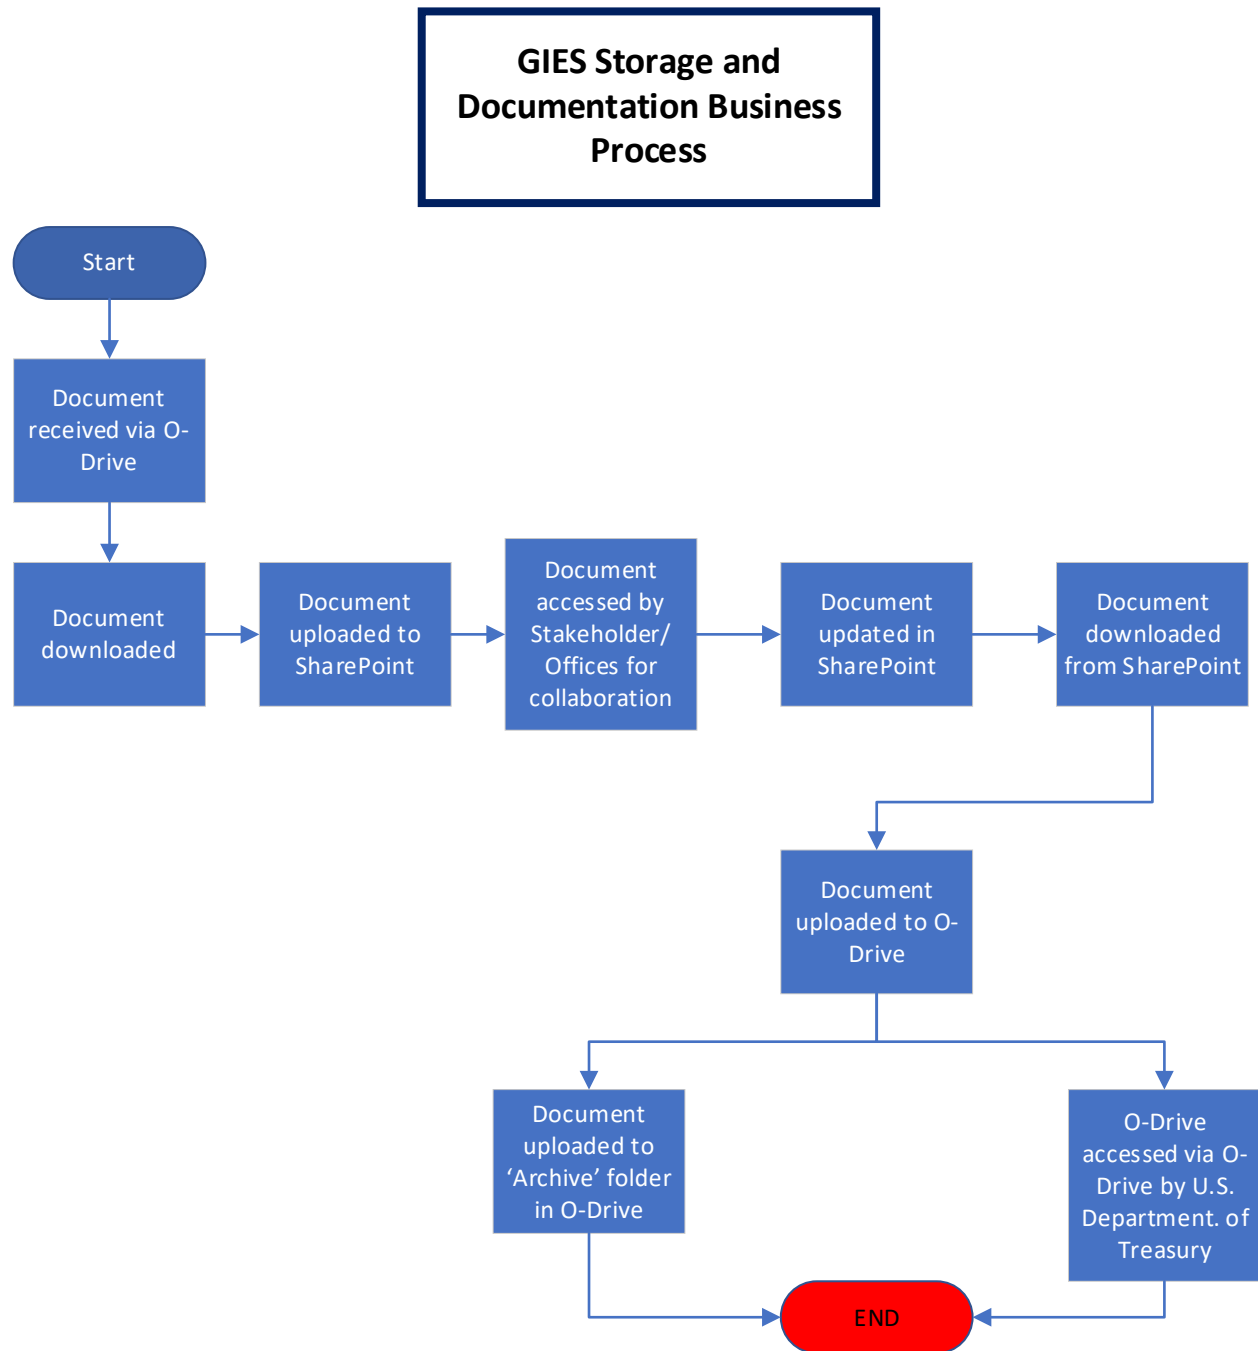

Figure 6: GES Storage and Documentation Process

MCEIP Storage and Documentation Process

The process map below outlines the necessary steps to upload, download, and transfer correspondence via SharePoint and O-Drive. Whenever a file is created within MCEIP, it must be uploaded and stored on the O-Drive. Once the O-Drive is accessed, there are three options for storing the file:

- 1) If the file requires updates and collaboration among stakeholders, it should be uploaded and updated via SharePoint. Once complete, it can be uploaded to O-Drive for accessibility.
- 2) If the file is for personal use and reference only, it needs to be uploaded to the individual's folder and named according to the file information.
- 3) If a file requires authorization or on a need-to-know basis, it should be uploaded to the Authorization folder. There, the file will be reviewed, authorized, signed, and stored in the Signed folder for records management purposes.

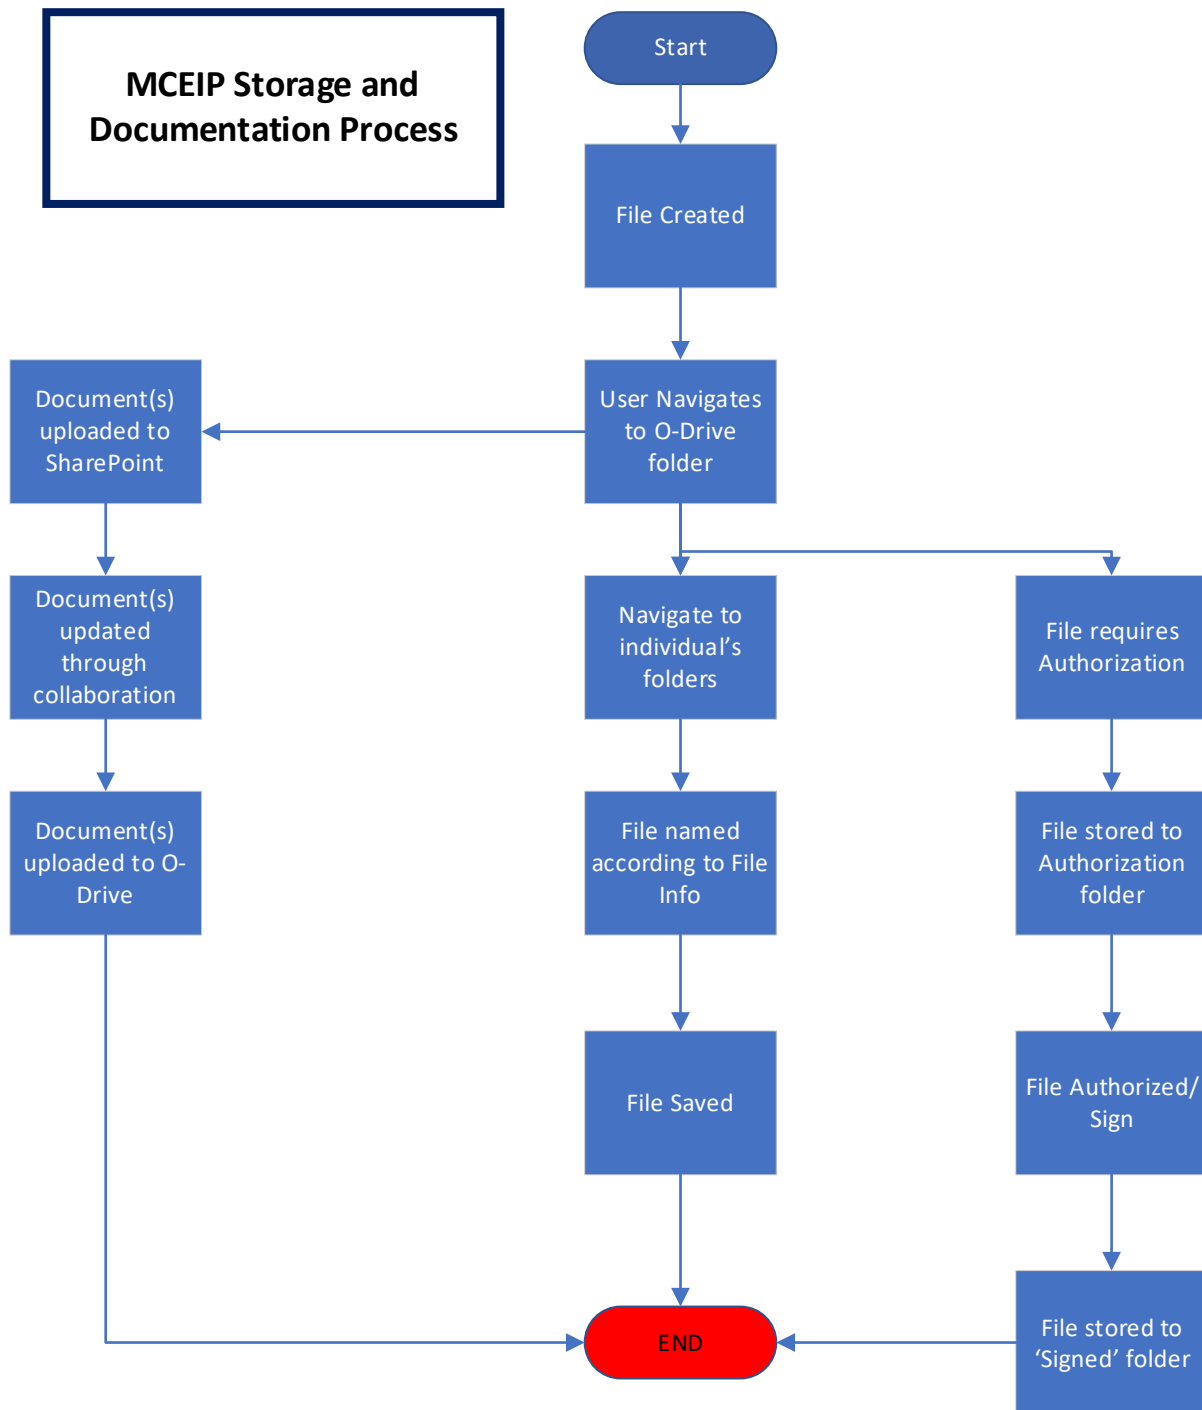

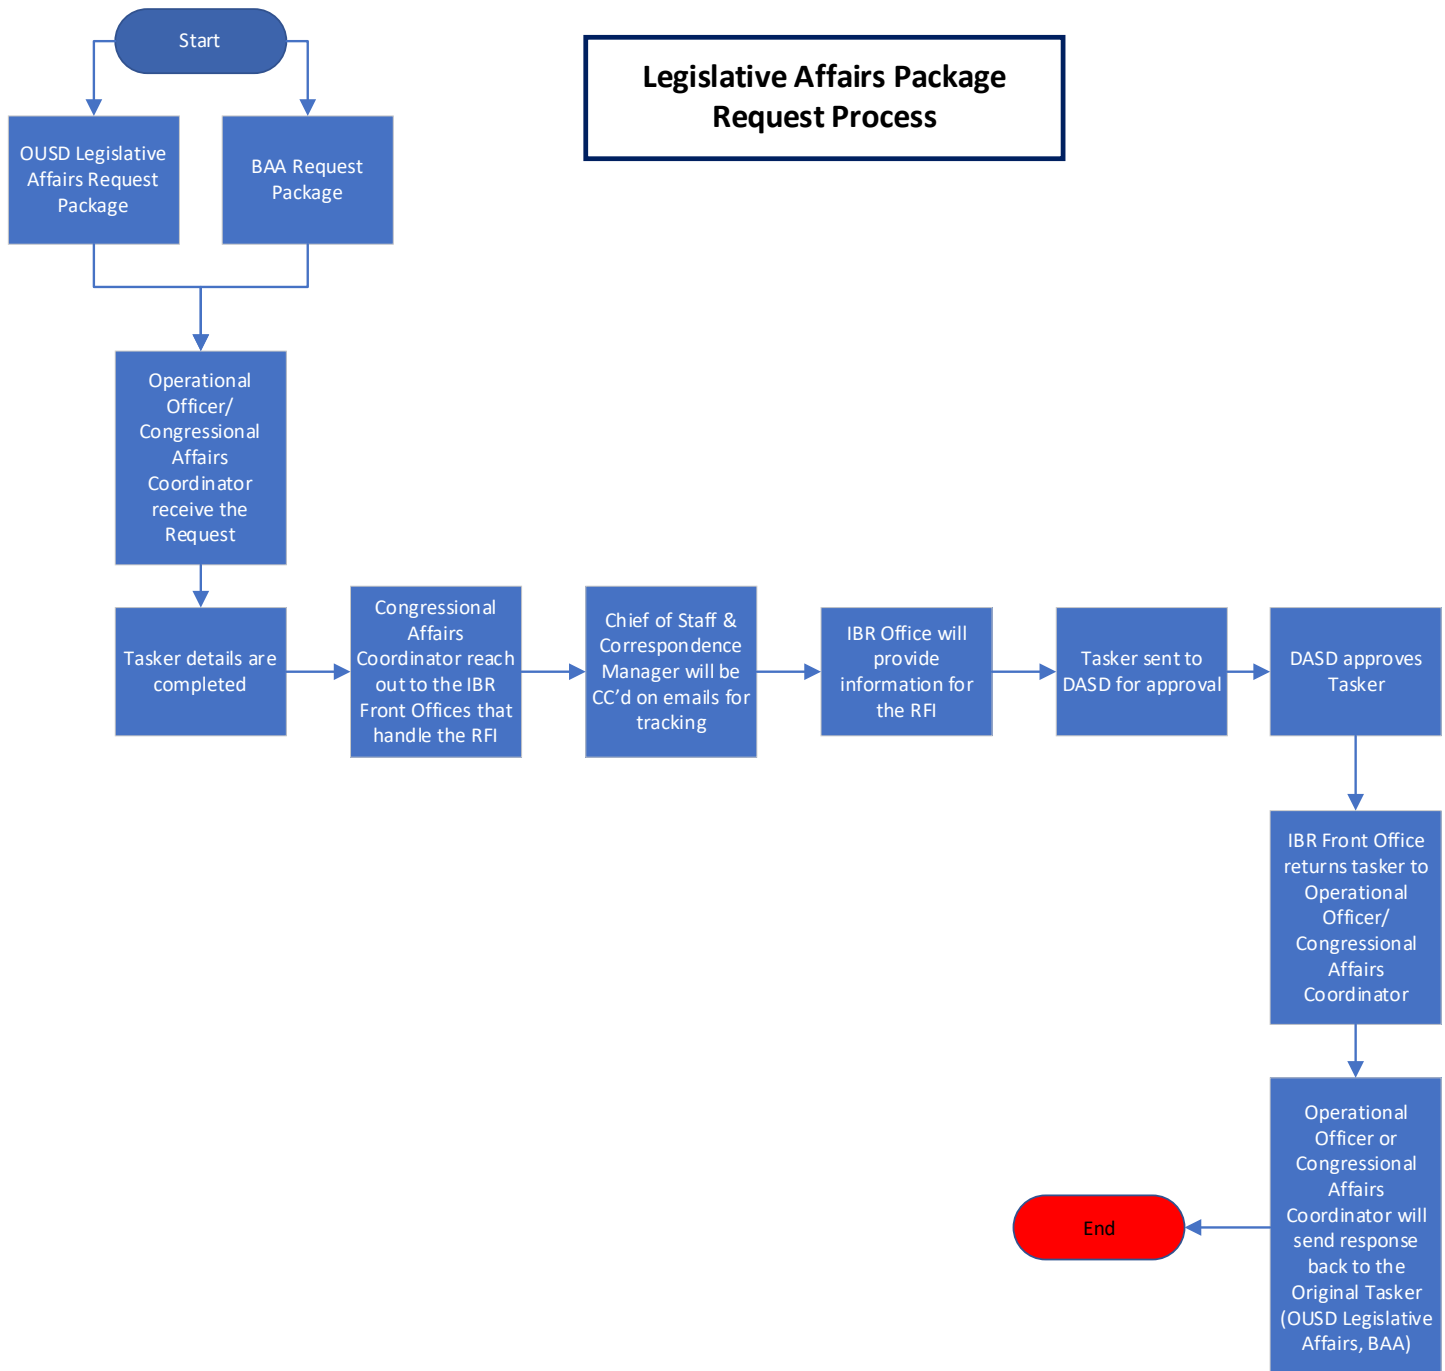

Figure 7: MCEIP Storage and Documentation Process

Legislative Affairs Package Request Process

The process map below outlines the necessary steps for requesting, coordinating, and approving a package via DASD. Package Requests are initiated by OUSD Legislative Affairs or BAA. These requests are sent to the Operations Officer (POC Elizabeth), and the Congressional Affairs Coordinator (POC Anup), to finalize tasker details for the package. After the details are finalized, Congressional Affairs Coordinator contacts the IBR Offices that will handle the RFI and CC the

COS and CM for tracking purposes. Upon receipt, the IBR Offices provide information for the RFI and forward the tasker for approval via DASD. Once the tasker is approved, the IBR Front Office returns the tasker to the Operations Office and Congressional Affairs Coordinator, who then send the response back to the original tasker, OUSD Legislative Affairs or BAA.

Appendix 8: Legislative Affairs Package Request Process

Meeting and Scheduling Process

The process map below outlines the necessary steps to request and schedule a DASD meeting. Proper planning is crucial when requesting a meeting with DASD attendance. Once the subject, date, time, and invitees are determined, requestor contacts the IBR Front Office to confirm DASD availability for the subject and date of the meeting. DASD then either confirms or rejects the meeting request. Upon confirmation is received, the location of the meeting will be determined based on the DASD availability and schedule.

After confirming the location (Mark Center, Pentagon, or Virtually), the meeting organizer creates a PowerPoint read-ahead. This will include the meeting's agenda, invitees, dial-in information, protocols (as needed), and any additional information to be discussed. Once the meeting invite is complete, an email is sent to all invitees, including DASH.

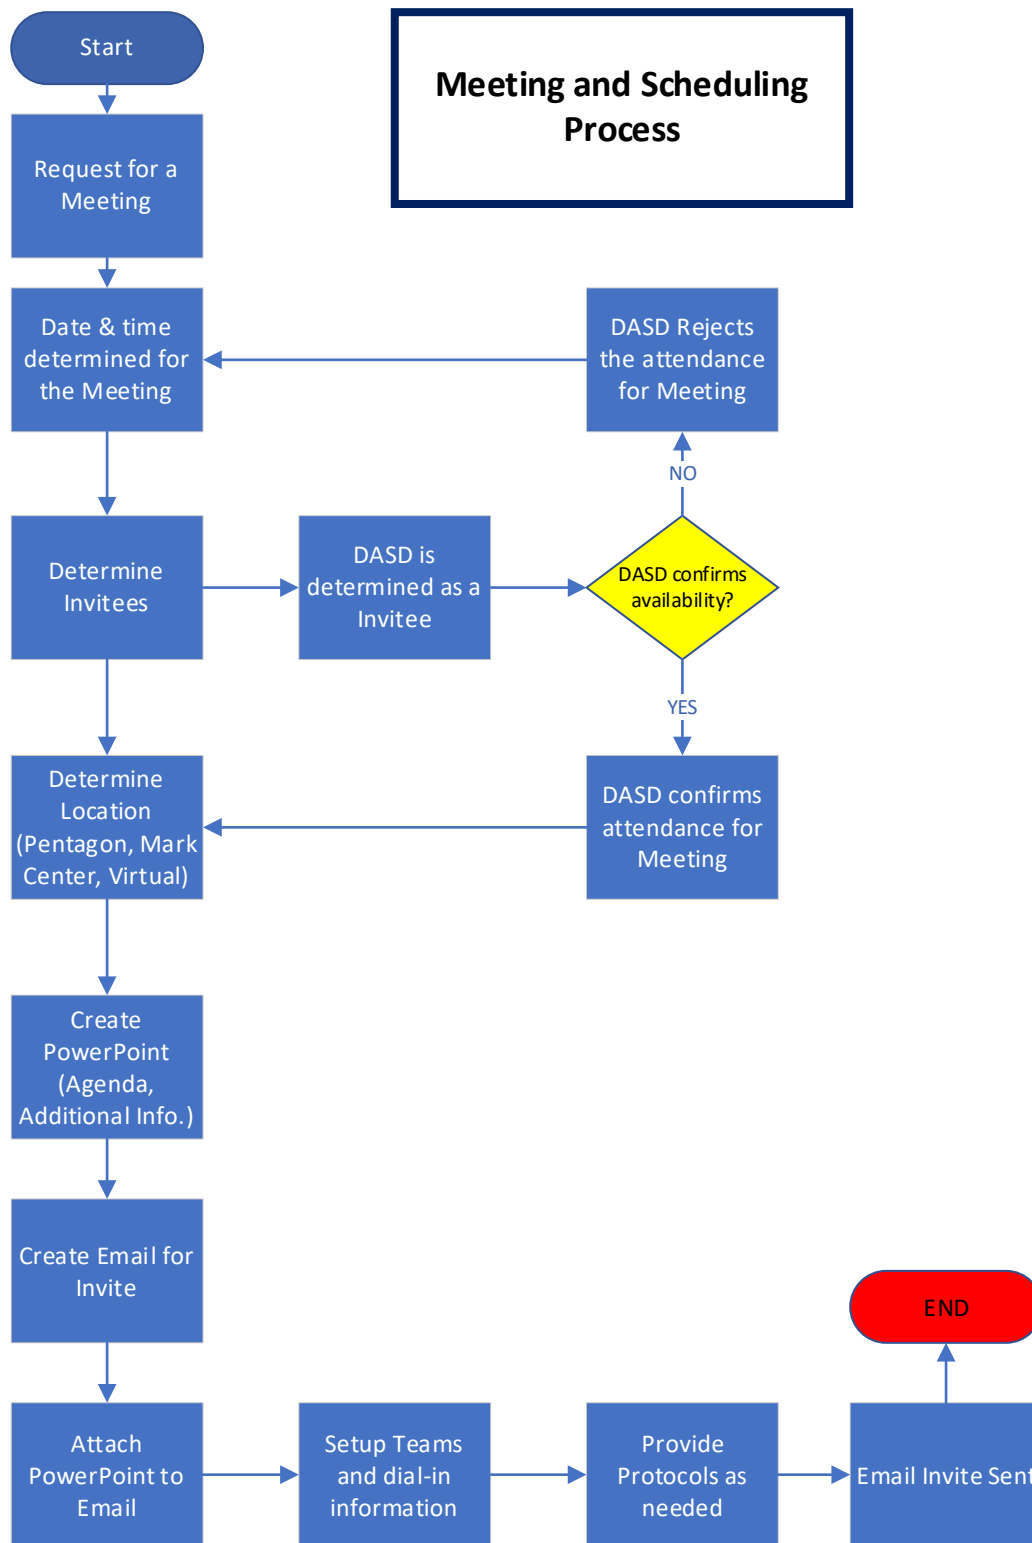

Figure 9: Meeting and Scheduling Process

PA&T Package Process

The process map below outlines the necessary steps to draft, review, and route a CATMS/Non-CATMS package for approval. The Action Officer (AO) will initiate the package review process by drafting the package and sending it to the Lead for review to kick off the package review process. After the Lead has reviewed it, the AO will forward the package to the Technical Editor to clear any discrepancies.

After the package is cleared, the AO will send the package to the Deputy Director for review/approval before sending it to the Director, Ms. Miller, for signature. If the package requires major changes, it will be rerouted back to the Technical Editors for further review/correction. Once the package and routing sheet receive concurrence and signature, the package will be returned to the AO. After receiving concurrence from the Director, the AO will coordinate the package in a specific order for review by internal/external AO, Stakeholders, et cetera.

Once the review is complete, the AO will determine if the package is CATMS or Non-CATMS. If it is a CATMS package, the AO will task the package to USA-IBP-IBR within CATMS and email the package to [REDACTED EMAIL] with an attached signed routing sheet by the Director. If it is a Non-CATMS package, the AO will email the package to [REDACTED EMAIL] with an attached signed routing sheet by the Director. [\[REDACTED EMAIL\]](#)[\[REDACTED EMAIL\]](#)

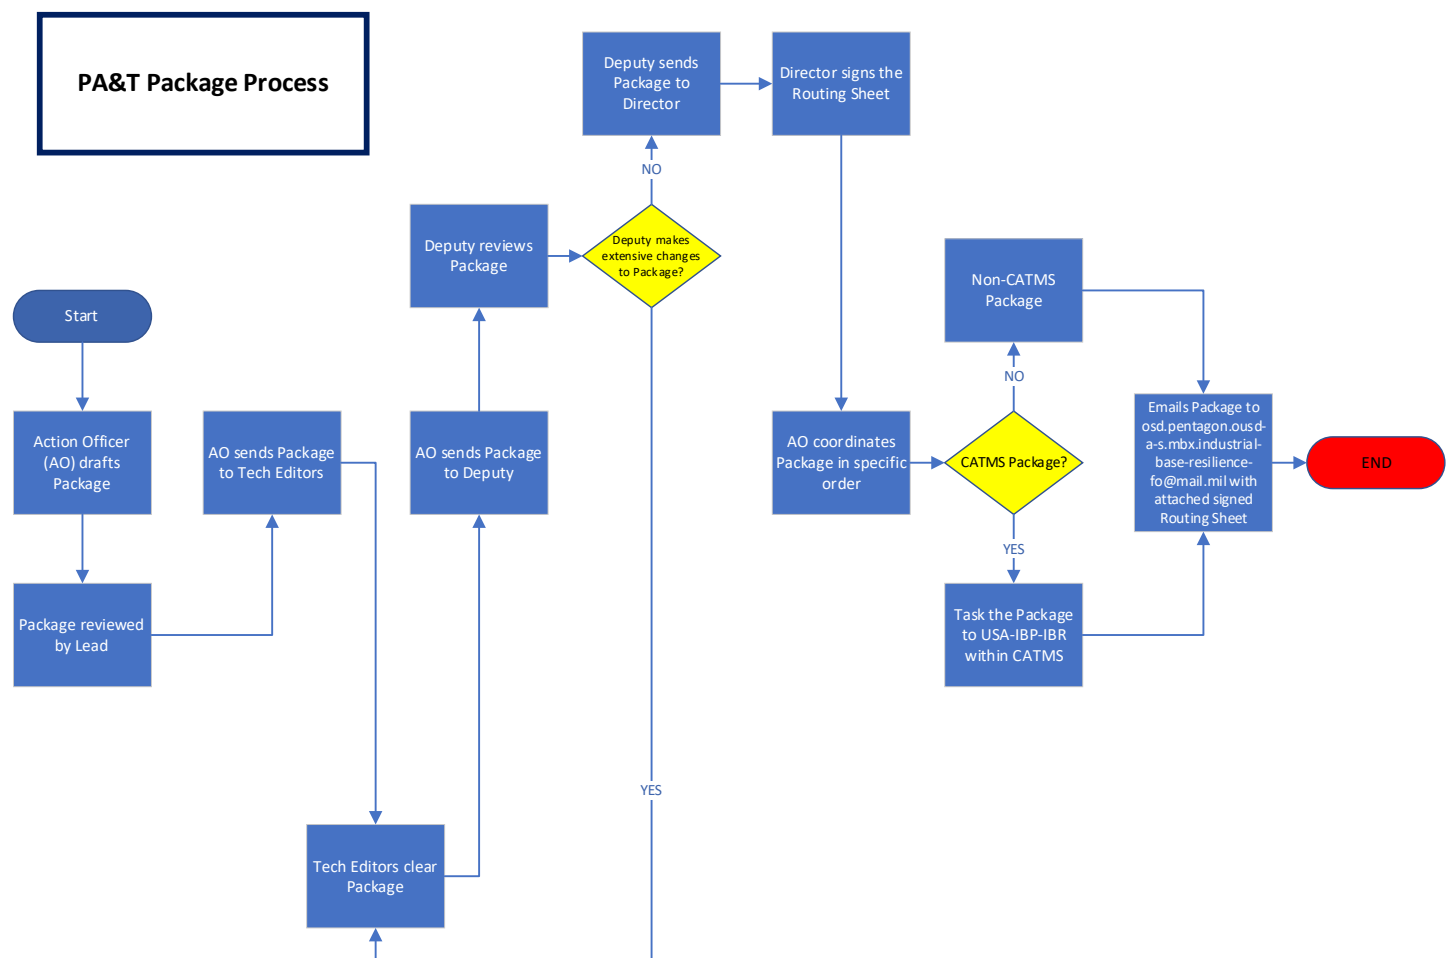

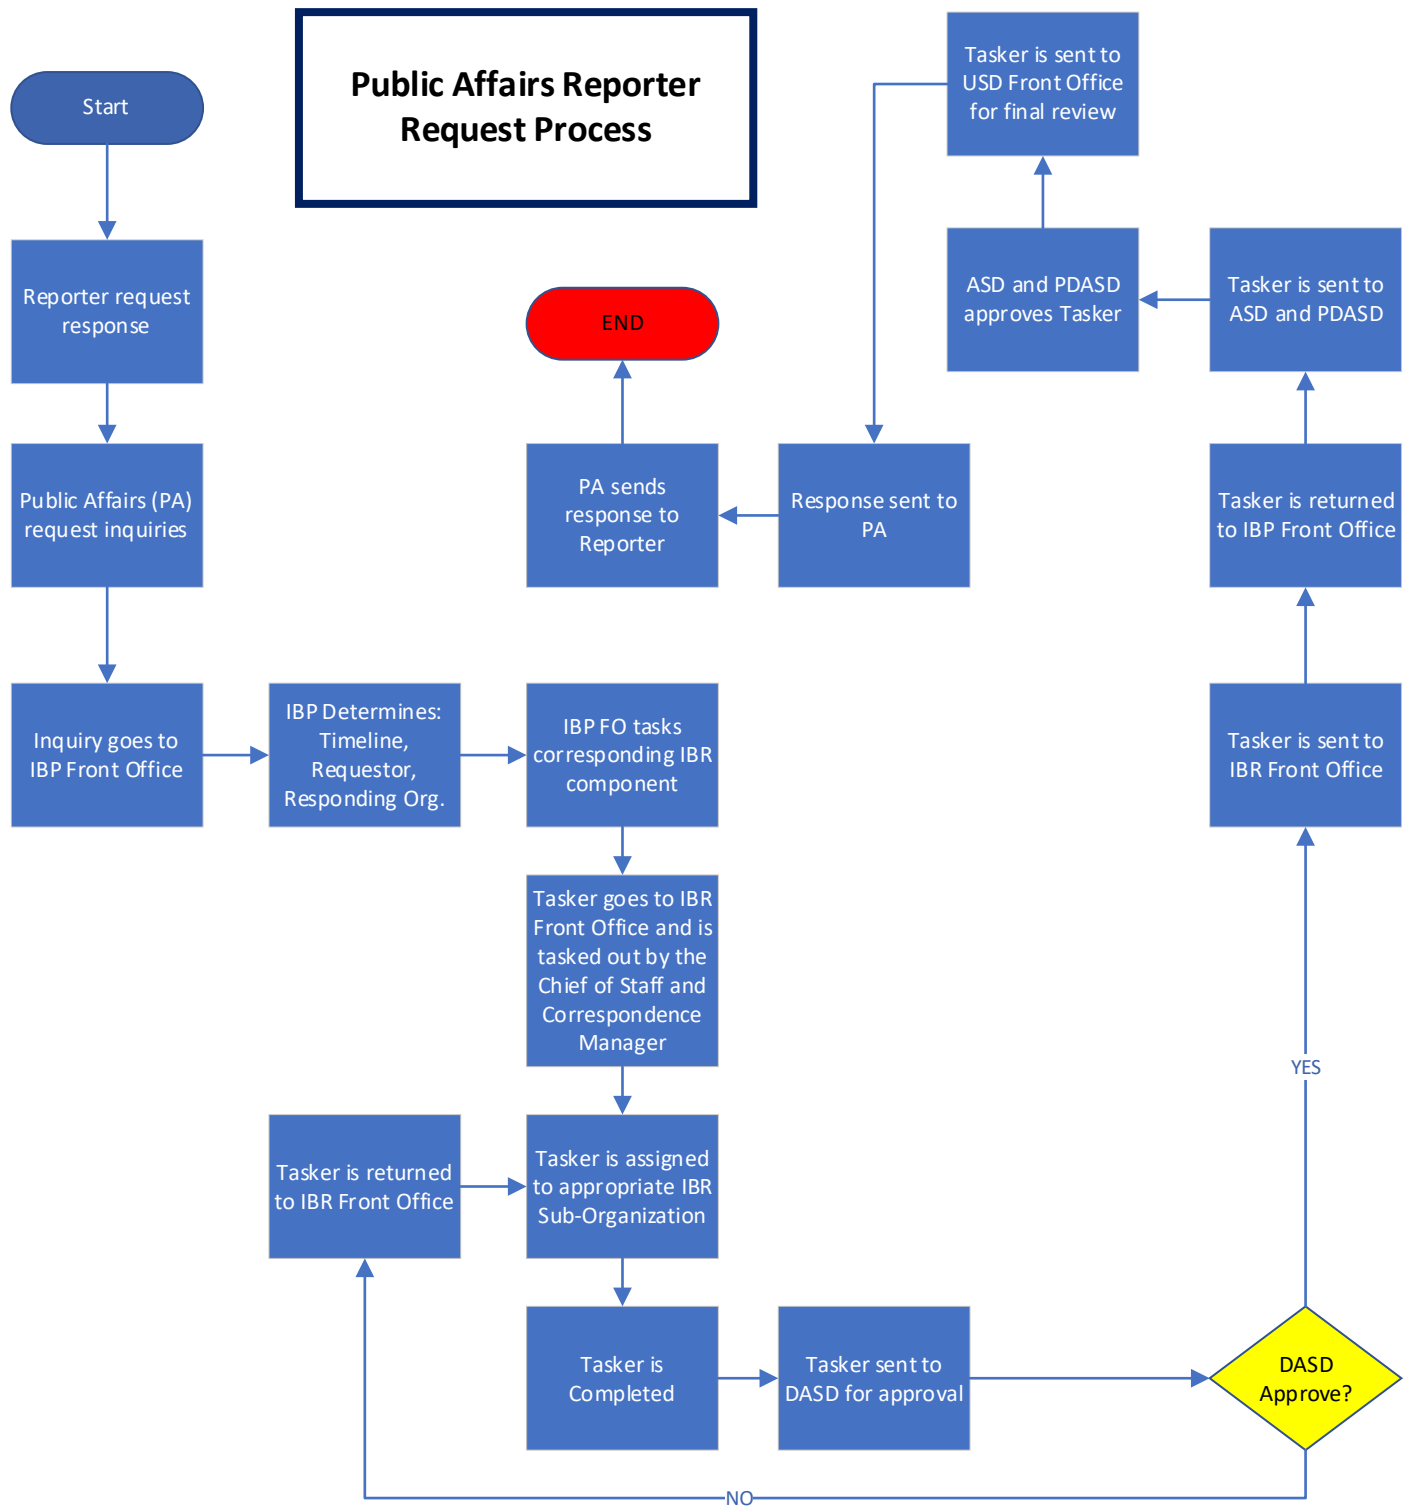

Figure 10: PA&T Package Process

Public Affairs Reporter Request Process

The process map below outlines the necessary steps for the review, coordination, and approval by DASD via Public Affairs (PA) for a Reporter Request. If a reporter requests a response from the PA, then the PA submits an inquiry request to the IBP Front Office. Upon receiving the inquiry, the IBP Front Office will determine the timeline, requestor, and appropriate responding organization.

The corresponding IBP component is then tasked with the inquiry. Once the IBR Front Office receives the tasker, the COS/ CM tasks the appropriate IBR Sub-Org for action and completion. The tasker and response are then sent to the DASD for approval or rejection upon completion.

If the response is rejected, the tasker is sent back to the IBR Front Office for correction/comments. If the response is approved, the tasker is returned to the IBR Front Office and sent to the Operations Office (POC Elizabeth) and the IBP Front Office. After the review process is complete and documented, the IBP Front Office forwards the tasker to ASD and PDASD for concurrence and approval. Once approval is obtained, the tasker is sent to USD Front Office for a Final Review/ Approval. Upon receiving approval by USD Front Office, the response is forwarded Public Affairs and then sent to the requesting reporter.

Appendix 11: Public Affairs Reporter Request Process

5.0 Conclusion & Next Steps

By identifying the current processes operating within IBR, Makai can better identify and address immediate workflow gaps that require improvements within those processes to create a more effective and efficient IBR working environment. Throughout mapping the current process landscape, we have identified the top priority processes to reengineer, including package creation and document storage, as well as opportunities for additional processes that do not yet exist, such as long-term deliverable planning and a RACI chart.

To address the immediate workflow gaps, Makai created Standard Operating Procedure SOPs and flow diagrams, improved the DASD approval process, conducted interviews with stakeholders, and identified immediate opportunities for Directors to assign responsibilities to personnel to ensure smoother information flow.

Changes resulted in fewer missed approvals (there were no missed approvals once the new system was in place), allowed the DASD to spend less time combing through emails to search for approvals and other action items, and reduced the approval time of packages, thus increasing office efficiency. SOPs and Process Diagrams are stored in the O-Drive under IndPol2 > IBR > SOPs and Process Maps.

Makai will continue to support IBR and enhance the Front Office's business processes by taking the following actions:

- Continue gap analysis
- Develop additional SOPs
- Process reengineering
- Begin facilitating change implementation
- Build out documentation repository
- Create automated forms for IBR Front Office requests
- Identify metrics/KPIs to be collected
- Create RACI chart

Appendix A – Internal and External Communication Protocol

Internal Communication Protocol

All internal items to be sent to the DASD including questions, approvals, review requests, and FYSA notices, shall be funneled through the Chief of Staff (with the IBR FO inbox CC'd). There should be no direct contact with the DASD.

1. All internal items to be sent to the DASD including questions, approvals, review requests, and FYSA notices, shall be funneled through the Chief of Staff (with the IBR FO inbox CC'd). There should be no direct contact with the DASD.
 - a. Internal Ask: Submit 3 days before you require action from the DASD.
 - b. Items to go to the IBP Front office/ASD: submitted 6 days before due date (3 days for DASD and 3 days for ASD).
 - c. Items to go to the DUSD: submitted 9 days before due date (3 days for DASD, 3 days for the ASD, and 3 days for the DUSD).
 - d. Items to go to the USD: submitted 12 days before due date (3 days for DASD, 3 days for the ASD, 3 days for the DUSD, and 3 days for the USD).
 - e. All short-term taskers need to include a justification that will help the Chief of Staff with prioritization (See template below).
 - f. Ask three before me approach. Please collaborate with your peers, Chief of Staff, Deputies, and Directors before sending an item up to the DASD. Many items that can be resolved on lower levels.
2. See [Appendix B](#) for the template for DASD Approval Request- Internal
3. Subject Line Convention
 - a. Emails should read: Action Requested, Suspense Date, Task Name

For example: APPROVAL: SUSP 19 July by 1600 Geranium Talking Points

External Communication Protocol

All external items to be sent to the DASD and IBR team, including questions, approvals, review requests, and FYSA notices, shall be funneled through the Chief of Staff (with the IBR FO inbox CC'd). There should be no direct contact with the DASD or anyone in the IBR organization.

1. The following Service Level Agreements will govern the appropriate submittal time:
 - a. Request for Approval or Feedback- submit 3 days before you require a response from the DASD.
 - b. Items that have composition requirements: suspense of 6 days* from ask.
 - c. All short-term taskers need to include a justification that will help the Chief of Staff with prioritization.
 - i. *Please be aware of the nature of the composition and plan accordingly (i.e. more in-depth response or task, add additional days to the time period to complete the task). When determining suspense for IBR personnel, remember, the DASD has 3 days to review anything before it leaves the IBR organization.

See [Appendix B](#) for the template for DASD Approval Request- external.

Appendix B - DASD Approval Request

DASD Approval Request- Internal

Subject Line: Emails should read: Action Requested, Suspense Date, Task Name

For example: APPROVAL: SUSP 19 July by 1600 Geranium Talking Points

Action Requested: i.e. approval, review, feedback.

Suspense: No item will be processed by the IBR Front Office without a suspense date.

Short Suspense Justification: For short suspense item, it must contain a reasoning for the rush and the contact information of the requestor.

Approval: Please confirm your Director has reviewed and approved any and every item sent to the Chief of Staff to be delivered to the DASD.

Assumed IBP, or External, Organization and POC(s): Add your desired organization and/or POC(s).

Description: High level description of the request.

Attachments: List all attachments.

Background Information: Attach, paraphrase, or paste in pertinent information that would help the approver fully understand the item being addressed.

DASD Approval Request- External

Subject Line: Emails should read: Action Requested, Suspense Date, Task Name

For example: APPROVAL: SUSP 19 July by 1600 Geranium Talking Points

Action Requested: i.e. approval, review, feedback.

Suspense: No item will be processed by the IBR Front Office without a suspense date.

Short Suspense Justification: For short suspense item, it must contain a reasoning for the rush and the contact information of the requestor.

Assumed IBR Organization and POC(s): Add your desired organization and/or POC(s).

Description: High level description of the request.

Attachments: List all attachments.

Background Information: Attach, paraphrase, or paste in pertinent information that would help the approver fully understand the item being addressed.

Appendix C – Correspondence

Package Management

Package Management is the process of handling requests from an internal or external source and routing them to the DASD for review/ approval with signature before the package can be sent to the ASD for further approval/signature.

However, not all packages require a signature such as, Industry and Request for Information (RFI), some only require concurrence from DASD.

1. DASD Package Management Overview
 - a. Receive items for DASD review and approval -> Get DASD approval on the item ->Send approved item to IBP FO for ASD approval
 - b. For DASD's approval, find out if you need DASD signature on Action Memo or Routing Sheet
 - c. Routing Sheet Signature: All packages going to the Front Office for ASD & PDASD signature
 - d. Action Memo Signature: Action and Info Memorandums to ASD & DUSD will be signed by the DASDs and Director(s), therefore the Routing Sheet does not have to be signed.
 - e. Usual people sending packages:
 - i. Special Assistant (ASD)
 - ii. Chief of Staff (MCEIP)
 - iii. Front Office Manager (PA&T)
 - iv. Correspondence Manager (GIES)
 - v. Correspondence Analyst Manager (IBP-FO)

Appendix E – Situations

Situation A: Package going to the Under was sent to you in the form of attachments for DASD review and approval.

1. Review package
 - a. Ensure the attachments align/match with those listed out in the action memo
 - b. Ensure the Routing Sheet has a spot for the DASD(IBR) to sign
 - c. Fill out the Routing Sheet by going to CATMS and searching the CATMS ID to get the necessary information.
2. Send package to DASD for Review
 - a. Place package into DASD's review folder on the on the O:/ Drive (ATL_ORG (O:) > IndPol2 > IBR > DASD > DASD Approvals).
3. Upload documents to CATMS* ([REDACTED URL][\[REDACTED URL\]](#))
 - a. After receiving the DASD approval with the signed Routing Sheet, search the CATMS ID in CATMS. Then, upload the signed Routing Sheet to action attachments and save it in the "For IBP Review" folder. In case the folder does not exist, create it and add any additional attachments to it.
4. Go to Tasker status in CATMS and click on "USA-IBP-IBR" *
 - a. Click on "accept" on the top
 - b. Go to Management Assignments
 - c. Search IBP in the search engine

- d. "Select USA-IBP-FO" and press Ok and then press Send (you just tasked IBP FO)
5. Send package to ASD FO
 - a. Send the package with the newly signed Routing Sheet to [REDACTED EMAIL] and CC Chief of Staff/Military Assistant, as well as whoever originally sent you the package. [\[REDACTED EMAIL\]](#)

Situation B: Package going to the Under was sent to you in the form of a CATMS ID for DASD review and approval

1. Search the CATMS ID in CATMS ([REDACTED URL][\[REDACTED URL\]](#))
2. Go to action attachments and download every item.
3. Perform same exact steps from situation A steps 1-5.

Situation C: You were sent an email that needed DASD review and approval (not a package)

1. Create a new email and forward the original email as an attachment, placing the attachment in the DASD's folder for review. *If the email sent by the original tasker is encrypted, DASD will not be able to open the attachments.
 - a. "Ma'am, please see below ____ for your review and approval.
 - b. Make sure to CC the Chief of Staff/Military Assistant after DASD approves.
2. Forward DASD's approval. Be sure to CC Chief of Staff/Military Assistant and whoever send you the original email.

*If the DASD has an edit, send her recommendation to the original Action Officer. Once they make the edit, place the new package in the DASD's folder for review and approval.

Situation D: Package has been sent to you and you need signature on the Action memo instead of the routing sheet

1. See "Prepare Action Memo" section.
2. Steps 1-5 on Situation A or B depending on if the email they sent you included the package attachments or if they only sent you the CATMS ID.

Situation E: A package has been sent to you via SIPR

1. Same process as Situation A and B except:
 - a. Be sure to check the action memos and be sure the designation indicators (SECRET, et cetera) are correct.
2. CATMS website on SIPR: [REDACTED URL]
